Natural materials vary from lot to lot, and even within the same lot, differences in shade, color and grain can be seen. For this reason, samples and photos should be taken as a guide only.

Естествените материали варират от една партида до друга, и дори в рамките на една и съща партида могат да се забележат различия в сянка, цвят и жили. Поради тази причина мострите и снимките трябва да се приемат само като ориентировъчни.
